FABRICATION	<p>Stanley knife if required</p>

CARE INSTRUCTIONS

Remove spills immediately using damp, clean cloth.

Dab Zintra with a clean, soft white cloth dampened with a mild solution of liquid detergent and warm water. Repeat using only clean water, then pat dry with a lint free cloth. Avoid using wax polishes, solvents or concentrated abrasives.

For more difficult stains, dampen a soft white cloth with a solution of household bleach (10% bleach / 90% water). Dab gently. Repeat using only a clean, water dampened cloth to remove bleach concentration, then pat dry with a lint free cloth. If care instructions don't deliver expected results, cease cleaning method immediately and contact Crown Surface Solutions.
